

**Name** Michael Stevens  
**Date of Birth** 01/23/1989

**Order #** 55683952

## Summary

### Negative

Your results do not detect SARS-CoV-2. A negative test means that the virus was not present in the sample you provided.

Your results suggest you were negative at the time of testing.\*

\*Although the possibility is low, a false negative result should be considered if you have had recent exposure to the virus along with symptoms consistent with COVID-19.

### COVID-19

This test checks for SARS-CoV-2, the virus that causes coronavirus disease (also called COVID-19), a respiratory illness.

Confirmation Code: bng4sgynBr; Draw location: PSC; Reference kit ID: 1130088512; ; This assay is designed to detect the ORF1ab, N and S genes of SARS-CoV-2 (also known as 2019-nCoV) using nucleic acid amplification. A Not Detected result does not preclude the possibility of 2019-nCoV infection since the adequacy of sample collection and/or low viral burden may result in the presence of viral nucleic acids below the analytical sensitivity of this test method. Test results should be used along with other clinical and laboratory data in making the diagnosis and should not form the sole basis for a diagnosis or treatment decision.; ; This test has received FDA Emergency Use Authorization and has been verified by Eurofins Transplant Genomics laboratory. This test is only authorized for the duration of the declaration and the circumstances that exist to justify the authorization of the emergency use of in vitro diagnostic tests for the detection of SARS-CoV-2 virus and/or diagnosis of COVID19 infection under section 564(b)(1) of the Act, 21 U.S.C. 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.; ; Eurofins Transplant Genomics laboratory is certified under CLIA-88 as qualified to perform high complexity testing. This testing was performed at 46774 Lakeview Blvd, Fremont, CA 94538 (CLIA License #05D2095237, CA #CLF-00347776, other as appropriate).; ; We will continue to follow federal and state requirements for both notification of results and any confirmatory testing that is required by another agency.; ; For More Information, please see the CoVid-19 Fact Sheets for Providers <https://www.fda.gov/media/136111/download> and for Patients <https://www.fda.gov/media/136114/download>;

### Next Steps

- Although your test results did not detect the virus, you should continue to monitor your symptoms for up to 14 days after your last possible exposure. Seek medical attention immediately if you develop severe symptoms, especially if you experience severe trouble breathing, continuous pain or pressure in your chest, feeling confused or having difficulty waking up, blue-colored lips or face, or any other emergency signs or symptoms.
- It's important to follow isolation or quarantine precautions as recommended.
- If you believe you have symptoms of COVID-19 or that you have been exposed to the virus, you should consult your place of work for specific guidance about whether to stay home or continue working. You should adhere to recommendations set forth by your employer or the department of health, as they may differ from the CDC's guidelines.
- If you have questions about this test or your results, you can contact the PWNHealth Care Coordination Team at 315-401-7865, Monday-Sunday, 8 a.m. to 11 p.m. Eastern Time, or email [covid19@pwnhealth.com](mailto:covid19@pwnhealth.com). You can also leave a message after hours and a PWNHealth team member will call you back as soon as possible.
